

INNOVATIVE HCM SUPPORTS CORE-BUSINESS INITIATIVES AT WISCONSIN-BASED COMPANIES

Automating Payroll Saves 40+ Hours of Operational Time for Wisconsin-Based Company

THE CLIENT

Batzner Pest Control, headquartered in New Berlin, WI, has been protecting homes and businesses for more than 70 years. The Batzner exclusive BAN™ System is a proven solution that achieves excellent results in commercial and residential environments. The Batzner family has always put customers first with its Legendary Service promise, and continues to be dedicated to quality, relentless about continuous improvement and focused on making the pest control experience easy, convenient and hassle-free. Batzner is the most trusted pest control firm in Wisconsin and Illinois.

“We chose Payroll Data because they were local, experienced, and easy to work with.”

CHALLENGE

As a family run company for over four generations, the team at Batzner were used to doing everything by paper and pencil. As the business grew, so did their HR challenges including collecting and reconciling 100+ timesheets during each pay period. They needed to keep pace with the industry by veering away from manual processes that took time away from mission-critical tasks. Since they could not afford to have their HR “offline” for an extended period of time to implement new systems, they required an expedited solution to modernize HR.

“Our dedicated support specialist is always very responsive.”

SOLUTION

Payroll Data’s innovative Time and Attendance, HR outsourcing services, and fully automated payroll processing helped Batzner get up to speed quickly. The implementation specialists worked with the team to have a new system in place in less than two months without downtime. By automating bi-weekly payroll with the fully integrated timetracking software, data populates accurately and timely in the system, and has saved Batzner over forty hours in manual labor.

“Working with the team at Payroll Data is surprisingly easy.”

- Melissa Krische, HR Dept, Batzner

Wisconsin-Based Startup Gains Marketshare with Help from Payroll Data

THE CLIENT

Gearbox Express, located in Mukwonago, WI, is the only independent company in North America solely focused on providing down-tower, wind gearbox remanufacturing solutions. Founded by industry professionals with years of experience in gearing and bearings, the focus of the company is strictly on gearboxes to maximize the longevity of the product. At the heart of the GBX operation is its 3.1 MW (4,000 hp) regenerative test stand that mimics real-life, often variable, wind conditions.

CHALLENGE

As a startup, solidifying their place in the industry left no time for payroll processing. The principals of the company were focused on getting the business off the ground and making headway in the market. Running payroll was not in the realm of their expertise, nor did they have the time to take on the weekly task. Gearbox needed a way to outsource payroll processing with precision accuracy as to not shift their attention from core business objectives.

SOLUTION

Payroll Data's automated processing and expertise on-demand was exactly what Gearbox was looking for. The implementation team helped Gearbox setup and run payroll with minimal administration - freeing the engineers to concentrate on establishing their company in a niche industry. Payroll Data introduced Gearbox to their dedicated support representative which provided the peace of mind needed moving forward, should questions arise or changes to the system need to be made. The flexible solutions Payroll Data offers has helped Gearbox evolve their payroll processing as the company has grown and expanded personnel since its inception.

“Outsourcing payroll helped us focus on building the company from the very beginning.”

“Payroll Data is very convenient, and very reliable.”

“Overall, it's been a great experience partnering with Payroll Data.”

- Bruce Neumiller, CEO, Gearbox Express

Integrated Payroll, HR, and Time & Labor Streamlines Operations at Wisconsin Manufacturing Company

THE CLIENT

The Delavan, WI-based Swiss-Tech, LLC is an established provider of custom-manufactured, precision Swiss machined components. Serving a variety of global customers in the medical technology, aerospace, and high-end industrial sector. Swiss-Tech's success is attributed to building a reputation for consistent high quality products, innovative manufacturing capabilities, and responsive inside sales all at a competitive cost.

CHALLENGE

The labor intensive and time consuming process of reconciling company W2s in-house was taking a toll on the Human Resources department. Swiss-Tech, needed a better way to handle compliance paperwork and reporting, and integrate aspects of time and attendance with payroll processing without getting bogged down by complex HCM systems that require extensive training and implementation.

SOLUTION

After vetting numerous options, Swiss-Tech partnered with Payroll Data to benefit from all of the features and capabilities they needed in a single, user-friendly platform. The fully integrated timekeeping component, automated payroll processing, and compliance reporting streamlined HR responsibilities and provided the data on-demand to make better business decisions. The engaging platform, with step-by-step screens and workflows, simplified the tasks and required minimal training. The team acclimated quickly and was very comfortable working in the system - exploring different features that made regular tasks faster and easier.

"I've been in HR for 20 years and have never met a customer service rep that is so helpful."

"...the report writing is awesome."

"The system is so easy you can basically teach yourself how to use it."

- Cheryl Rinker Roth, HR Manager,
Swiss-Tech LLC
